Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 March 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Response to Arguments

Applicant's arguments with respect to claims 54, 55, and 68-70 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 54, 55, 68 and 69 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuslich US 5,571,189.

Kuslich discloses an interbody spine fusion comprising a body (40) defining an outside surface, a carrier (52), a carrier receiving area (see Figure 6), implanting the bone implantable device adjacent a target bone structure (see Fig. 6), applying biologically active substance onto the carrier after said step of implanting for subsequent delivery to said target bone structure (see col. 7, lines 8-20; col. 7, lines 47-52; col. 9, lines 40-58).

Claims 54, 55, 68 and 69 are rejected under 35 U.S.C. 102(b) as being anticipated by Brekke US Patent 5,683,459.

Brekke discloses an interbody spine fusion comprising a body (see Figs. 1-6) defining an outside surface, a carrier, a carrier receiving area (see pores), implanting the bone implantable device adjacent a target bone structure, applying biologically active substance onto the carrier after said step of implanting for subsequent delivery to said target bone structure (see col. 7, lines 14-67).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 70 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuslich US Patent 5,571,189.

Kuslich discloses the invention substantially as claimed. However, Kuslich is silent regarding the biologically active substance liquefies after contact with body fluids.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to modify the biological active substance of the Kuslich reference by having an active substance that liquefies after body contact because Applicant has not disclosed that by having the above mentioned substance provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with Kuslich reference because it would perform equally as well.

Therefore, it would have been an obvious matter of design choice to modify the Kuslich reference to obtain the invention as specified in claim 70.

Allowable Subject Matter

Claims 21, 56, 58, 60, 62, 63, 65, 67 and 72 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).
